DeGroff Place.

De Groff Place was among the first additions lying south of the city in which lots were offered for sale last year. Twenty-four lots were sold to nine different purchasers, all of whom purpose building hadsome residences. Not less tha fifty feet front has been sold to a purchaser. A few more lots will be sold this spring to persons who will make desirable improvements. There has been no increase in the price charged for lots, the owner preferring to sell to those who will make improvements which will add value to the remaining lots rather than obtain high prices or quick sales.

De Groff Place lies on Springfield avenue, adjoining and yet outside the city limits and two blocks from the Grand Boulevard; on which is now a horse railroad. This horse railroad, the owners claim, is to be supplanted within the next two years by a cable road, the franchise for which was granted by the council a few weeks ago.

The reasons assigned a year ago why property in De Groff Place would prove a good investment are equally applicable to-day and we reproduce them:

1. Because DeGroff Place lies in the right direction from Kansas City. It is south. The cities of the world, as they have grown in population and wealth, have, except where there were physical obstacles, spread to the south and west. The reason of this is obvious. The breezes of the summer are from the south and southwest, and the purchasers of new homes always consider health before everything else, unless, possibly, convenience, and accessibility, and that point, in a city, where can be had in summer cool, fresh breezes, unpolluted by having passed over a crowded population, is the one which will be chosen, everything else being equal. The health statistics of the principal cities of the world are endorsements of the wisdom of this popular inclination to seek the southern and western portions of a city for a home. With rare exceptions the most healthful portions of all cities are the southern and western, and in the few cities where the reverse is the case, the reason can be found in some local cause-a marsh, a slaughtering or rendering establishment, or something else of a similar hature polluting the air. Epidemics and disease find no harbor where there is pure air.

2. Because DeGroff Pllace is at an elevation nearly 300 feet above the Missouri river, a greater altitude than any other ground in Jackson county, west of the Blue, not excepting the high ground on Troost avenue. The view to the south extends for miles beyond the high prairies south of Westport. If in summer there is a breeze stirring it will reach De-Groff Place.

3. Because of the "lay of the ground" the surface drainage of DeGroff Place is complete, and the porous character of the soil will secure dry yards, dry cellars and 11, "reets.

4. Because a well, furnishing an abundance of the purest water, can be had anywhere in DeGroff Place by boring 15 to 25 feet.

5. Because of its location between Grand Boulevard and Troost avenue, the two popular drives to the south from Kansas City. Grand boulevard is 100 feet in wid. Springfield aveth, the north nue-60 feet line of DeGron ace, connects Grand boulevard and Troost avenue and is equally popular with them as a drive.

6. Because De Groff Place is only 5 cents from the business center of Kansas City. The West port Street railway is within two blocks. The road will, in a few months be changed, it is elaimed, to a cable road, which will make this property accessible by a firstclass street railroad.

7. Because DeGroff Place is nearer the business center of the city than any other addition where lots can be had at so low a price. The distance to Main and other business streets is not great, as will be seen by making some comparisons. Remember De Groff Place is due south of the city on Grand avenue. It is the same distance from the Junction or any other point on Main street, as is Eighteenth and Olive, Twenty-second and Woodland, or Fairmount Park. It is nine blocks nearer the business center than is property similarly located on Troost ave.

8. Because the streets from Kansas City, running sout be given easier grades than those running in any other direction, and when the streets between Grand Boulevard and Troost avenue have been opened, graded and improved, as they doubtless will be soon now that the limits of

the city have been extended, property south of the city will take a boom, doubling, trebling and quadrupling in value. Indeed, it has only been since the improvement of Grand Boulevard and Troost avenue that real estate investors have regarded the property lying south of the city as accessible, and prices, therefore; have not ranged with those asked and paid in other direc-

Men's Scarlet, medicated all wool Shirts at \$1.38. These were \$2.00.

Men's all pure SILK Shirts and Drawers (nine thread) at 33 1/3 per cent off regular prices to close.

GENTLEMEN,

We hardly think it necessary for us to add any words to the above, except to say that we recommend this as a good opportunity to buy, even if you have no use whatever for the goods NOW. We shall sell all we have—there's no doubt about that; so that if you think of purchasing come without fail on Saturday.

N. B. Our Men's Furnishing Goods department will remain open to-morrow (Saturday) evening until 10 o'clock.
